Nexora Technologies Company Overview

Company Overview

About Nexora Technologies

Nexora Technologies Private Limited builds cloud software that helps small and mid-sized businesses manage accounting, business workflows and security operations.

Nexora Technologies is a fictional company created for a secure retrieval demonstration. No statement in this document describes a real organisation.

Founding and Headquarters

Nexora Technologies was founded in 2014 by Kiran Desai and Omar Siddiqui.

The company headquarters is Nexora House, 18 Riverfront Tech Park, Ahmedabad, Gujarat, India.

As of 1 April 2025 the company employs approximately 420 people.

Mission and Values

Mission: to make secure, reliable business software affordable for every growing company.

Values: customer trust first, security by default, ownership of outcomes and continuous learning.

Departments and Organisational Structure

Leadership Team

Chief Executive Officer: Kiran Desai. Chief Technology Officer: Omar Siddiqui. Chief Financial Officer: Lata Raghavan. Chief Information Security Officer: Harsh Vardhan.

Departments

Human Resources (HR) runs talent acquisition, people operations and employee relations.

Finance (FIN) runs budgeting, accounting, payroll and procurement.

Engineering (ENG) designs, builds and operates all Nexora software products.

Security (SEC) runs information security, the security operations centre and compliance.

Operations (OPS) runs IT administration, facilities, customer support and sales operations.

Department Headcount

Engineering has 190 employees, Operations 120, Finance 45, Security 35 and Human Resources 30, for a total of 420 employees.

Reporting Structure

Each department is led by a department head who reports to the Chief Executive Officer. The Security department reports directly to the CEO so that security decisions remain independent of delivery pressure.

Products, Services and Operating Regions

Products

Nexora Ledger is a cloud accounting and GST-ready invoicing product launched in 2016. It serves 6,800 business customers.

Nexora Flow is a no-code workflow automation product launched in 2019.

Nexora Shield is a managed security monitoring service launched in 2022.

Services

Nexora provides implementation, onboarding training and 24x7 support for enterprise plans. Standard plans receive support from 09:00 to 21:00 IST.

Operating Regions

India: headquarters in Ahmedabad and offices in Bengaluru and Pune.

United Arab Emirates: a Dubai sales office opened in 2021.

Singapore: a regional office for South-East Asia opened in 2023.

Nexora serves customers in 14 countries.

General Company Policies and Public Contact Information

General Policies

The Nexora Code of Conduct applies to every employee, contractor and partner.

Nexora never sells customer data. Customer data is stored in the India cloud region unless a customer contract specifies another region.

Nexora runs a responsible disclosure programme for security researchers.
